E-Research Implementation Committee  
Thursday May 22 2013  
323c Main Library  

Attending: Sarah Williams (chair), Sarah Shreeves (minutes), Bethany Anderson, Peg Burnette, Tom Habing, Karen Hogenboom, Laila Moustafa, Kyle Rimkus, Beth Sandore, Mary Schlembach, Christie Wiley

1 – Introductions and Welcome to new members (Christie and Bethany)

2 – Discussion of DMPTool webinar series.  
The Task Force made the decision to host the May 28, June 4, and June 25 webinars in 314. We decided that when scheduling we’d add an extra half hour to discuss the content of the webinar among ourselves. We will check back with the webinar schedule later in the summer to see if there were others that we were interested in hosting. Sarah will send out a message for a volunteer to organize.

3 – Discussion of Data Information Literacy conference at Purdue.  
The committee decided to send Merinda Hensley, Karen Hogenboom, and Christie Wiley.

4 – Discussion of Scholarly Commons as eResearch support hub.  
The areas that the Scholarly Commons will need support in this summer are the development of the web pages about data management, identifying the core eResearch services (many of which are already offered), and developing a referral system in order to send questions to subject specialists and vice versa. We also noted that we will want to do concentrated marketing and outreach; there is already an effort planned for the summer and fall within the Scholarly Commons. We will look at extracting questions from DeskTracker (perhaps adding a specific category for data management questions?).

Sarah S. will establish a generic email – researchdata@library.illinois.edu – for users to send questions to. All members of the committee as well as Scholarly Commons staff will be on this list. When we respond to questions coming through we should reply all so that others can see the response.
