

Embedding a Player in WordPress

Copying the Code

The following explains how to embed a player in WordPress. Please note that you will copy a different set of code when embedding a player in other blogs and webpages.

Hands-on:

Copy the WordPress Code

1. In the left section of the console, click the **Players** icon.

The following is displayed

Name	Size	Channel	
Sarah Hjeltness	400x300	Sarah Hjeltness	swap info refresh delete

2. Click the **info**  icon to access the WordPress code.

Players

Properties for your player that help you get your player online.

Hint: Roll your mouse over the field labels to learn more about the different player properties.

HOME SHOWS CHANNELS PLAYERS

logout SplashCast account settings

Player Information Sarah Hjeltness

Properties Map Blog

Name Sarah Hjeltness

Create Player HTML: learn more ?

Size 400x300

Start at First Show in Channel

Auto play

Player HTML:

```
<embed src="http://web.splashcast.net/go/so/1/p/SLBU7550DM" wmode="transparent" width="400" height="300" allowFullscreen="true" type="application/x-shockwave-"
```

copy HTML text

If you don't have a web page, click here to start a free WordPress blog.

WORDPRESS

Add player to WordPress by pasting the code below into your blog post.

[splashcast SLBU7550DM]

copy WordPress code

add to Pageflakes + (You will need the player code below.)

Player code: SLBU7550DM

copy player code

cancel save

3. In the window that is displayed, click **copy WordPress code**.

Pasting the Code into a WordPress Page

A WordPress blog has been created for this training. Each participant will have his or her own page on which to display their shows. Complete the following steps to embed your SplashCast player in your WordPress page.

Hands-on:

Edit the WordPress Page

1. **Open** a new tab or window in your preferred web browser.
2. **Navigate** to <http://wordpress.com/>
3. **Login** using the following information
 - Username: **fsisplash**
 - Password: **fsi2008splash**
4. **Click** on the link to **fsisplashblog** as shown in the image below.

The screenshot shows the WordPress.com homepage. At the top, there's a navigation bar with 'My Account', 'My Dashboard', and 'New Post'. Below that, the WordPress logo and 'WORDPRESS.COM' are visible. A search bar is on the right. The main content area features a 'Hawt Post' section with a featured post titled 'Macross Frontier: I Wanna Be a Pop Star'. Below this are 'News Departments' with categories like 'IN FOOD', 'IN BUSINESS', 'IN POLITICS', and 'IN TRAVEL'. On the right side, there's a 'Right Now in Tags' section with various tags like 'Art', 'Books', 'Culture', etc. A red circle highlights the 'Your blogs' section, which lists 'fsisplash' with a 'Visit Site' button next to it.

5. At the top of the page click on [Visit Site](#)
6. On dashboard click on **Write** and then **Page**.
7. Type in **your name** in the Title box.
8. Select the **HTML** tab and type in an intro.
9. Then paste the **WordPress code** by right clicking and selecting **Paste**.
10. On the right click **Save** and then **Publish**.
11. **Preview** your page and your player by selecting the **View This Site** button near the blog title and selecting your name from the right-most column.
