

Appendix G
CS Student Interview Questions
Undergraduate Library Student/Library Collaborative

What are some mobile applications that you currently use for your library, research, or coursework?

What library/research needs do you think a mobile application can help meet?

What location specific needs that students have do you think a mobile application could help meet?

For the application that you designed, what do you think are some example use cases for how students would interact with your app?

What aspects of the app design process worked well for you?

What aspects of the app design process would you change?

Could you talk about to the data problems that library systems face?

Would you participate in a collaborative design process with library personnel again? Why or why not?

Is there anything else that you would like to share regarding this process or about the potential use of mobile applications by students in a library setting?

What is your current affiliation with the University of Illinois (student-year) and how long have you been affiliated with the University?

What is your major?
