

Creating Concept Maps

How Do I... Undergraduate Research Guides

In this guide you will learn how to:

- Make use of a concept map in your research.
- Understand the importance of keywords in research.
- Use alternative terminology when you start your research.

Part of the “Start My Research Series”

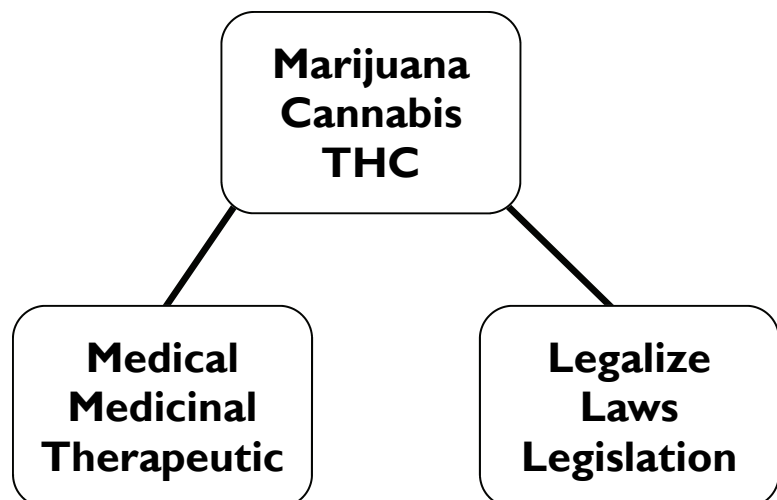

What is a concept map?

A concept map provides you with a visual image of your topic and its various aspects. It includes:

- The main topic idea in the center of the map with other aspects of your topic surrounding it (these are your keywords).
- Alternative terminology (keywords) to describe your topic should be included for each keyword.
- The relationships of the various aspects of your topic to each other.
- The opportunity to think of your topic in new ways.

As an example:

If one of the research questions for your topic was:
*Should the **medical** use of **marijuana** be **legalized**?*
your concept map might look like this:

Need More Help? Ask a Librarian!
