Performance tips:
Playing a hoedown is a little different from playing your regular solos or orchestra music. You don't have to play exactly what's on the page, you just have to stay in the right key and keep the right number of beats.

The skeletal melody is a framework; the variation shows you a few ideas of things you can add to personalize it. You can try altering the rhythm, adding slurs or double stops, or filling in spaces in the music.

Try bending the first note in measure 20 for a cool sound. There is lots of room for open A string drones in this tune too. Visit www.Bow-DaciousStringBand.com for more tips.
