FOREWORD

All over the world social and economic structures are changing rapidly. These changes demand continuing improvements in information technology. The ability to provide high quality data and reliable statistics must grow to meet this demand.

The State Institute of Statistics of Turkey bears the important responsibility of collecting, analyzing, and publishing data on Turkey's social and economic condition. The Institute continually strives to improve its technology, research methods, and analytical capability.

We believe that the availability of reliable and current statistics can play an important role in the process of democratization, public awareness, and the improvement of the human condition. The aim of SIS publications is to offer statistical data to public and private institutions, both foreign and domestic, in order to present a clear picture of Turkey—both its current conditions and its future potential.

Prof. Dr. Mehmet KAYTAZ
President
The State Institute of Statistics

EXPLANATIONS

This catalogue is prepared to show what kind of data and statistics SIS has and how to access them. Publications are grouped as general, national accounts, agriculture, industry, building construction, prices and indexes, foreign trade, services, transportation, finance, environment, population, labour force, demography, education and culture, justice, tourism and election.

SIS can supply statistics in the following information media:

Publications

Magnetic tape

Diskettes

On-Line and Internet

In this publication the subject, title and date of each publication is listed, and a brief summary of subject, format, length and ISBN of each publication is provided.
