Marital Status Across the World

The following data shows the percentage of people across the world and their marital status from 2000 - 2010. Each color represents female or male, and if they are single or married. The different points of the pentagon are the ages of the group. The smallest pentagon represents 10% and increases in size with each 10%. So the outside pentagon is 100%. The genders who are single also include the data of people who are divorced and widowed.

Data was provided from http://data.un.org/DocumentData.aspx?id=322
