

Notification Procedures

In the event of severe weather, the Library's procedure for the notification of individuals within the library gives responsibility to the Central Stacks and Circulation Unit. In most cases, this notification will be via the Library's PA system and postings to Lib-news. Central Circulation will make every effort to notify library personnel and patrons of watches and warnings, but units also need to monitor the weather situation by keeping their weather radio on at all times.

The sequence of notifications and the unit-level responses are outlined as follows:
