

Working Group to revise the Library's policies related to grants

The Library's policies on the administration of grants and the distribution of ICR (indirect cost recovery) funds require updating and thoughtful revision. We intend to convene a Working Group charged with providing advice to the AUL for Research that shapes a policy that supports Library faculty and Academic Professionals to successfully garner external support for research and other sponsored activities, and to comply with local, state, federal and private financial and regulatory requirements that govern these awards. The revised policy will be submitted for review to the University Librarian and the Administrative Council by June 30, 2016.
