Placing Work Orders	3
Checking the Item into a Work Order Department	5
Removing the Work Order	9
Changing the Item Location	12
Returning the Item to its Original Location	18

Introduction

These instructions are for libraries who would like to highlight specific items from the University Library's collection on a display.

Note: In order to use these instructions, the requesting library will need a work order department. They will also need to identify which location to use as the display location.

Placing Work Orders

Note: For more detailed instructions, see the “Placing a Work Order” documentation at <https://www.library.illinois.edu/staff/alma/>.

Basic Steps

- Search for the item in the Persistent Search Box.
Note: If you used the “Physical Titles” parameter, click the “Items” button (or click the “...” button and select “Items” from the drop-down menu) to get to the list of items.
- Click the “...” button next to the specific item. Select “Work Order” from the drop-down menu.
- Select the appropriate department to send the item to (typically your own department).
- Check or uncheck the “Do not pick from shelf” checkbox, as appropriate:
 - Item in hand: If you have the item with you, the box should be checked.
 - Item on shelf: If the item still needs to be retrieved, make sure the box is unchecked.
- Add a note about the pop-up collection.
- If it didn’t automatically populate, select the Managing Department from the drop-down menu.
- Click “Submit”.
- Repeat this process for each item that will be in the pop-up collection. If you want multiple volumes from a series in the collection, place a Work Order on each volume.

Detailed Workflow

1. Search for the item using the Persistent Search Box at the top of the screen in Alma, and then open the “Place Item in Process” screen. The procedure for this is different depending on if you’re using “Physical Titles” or “Physical Items” as the first parameter.
 - a. For the “**Physical Titles**” parameter, find the appropriate search result and click the “Items” button. (If it’s not visible, click the “...” button and select “Items” from the drop-down menu.)
 - i. Next, find the appropriate item in the list and click the “...” button. Select “Work Order” from the drop-down menu.
 - b. For the “**Physical Items**” parameter, find the appropriate search result and click the “...” button on the item’s record. Select “Work Order” from the drop-down menu.

The screenshot shows the Alma library system interface. At the top, there is a search bar with the text "Physical items" and "Keywords" selected, and the search term "African theatre Layiwola". Below the search bar, there is a "Physical Items (1 - 1 of 1)" section with the title "African theatre Layiwola". The interface includes a "Facets" sidebar on the left and a main content area with a list of search results. The first result is "African theatre in performance : a festschrift in honour of Martin Banham / edited by Dele Layiwola." with various metadata fields such as "Book By", "Barcode", "Library", "Creation Date", "Modification Date", "Expected Arrival Time", "On Hold Expiration Date", and "Due Date". A dropdown menu is open next to the item, showing options like "Resource sharing request", "Toggle Missing Status", "Work Order", "Holdings", "Display in Discovery", and "Items". The "Work Order" option is highlighted with an orange box.

2. From the “Place Item in Process” screen, in the “Process Type” field, select the department where you want the item to go for the pop-up collection. This will usually be your own department.
3. Determine if the “Do not pick from shelf” checkbox should be checked.
 - a. **Item in hand:** If you have the physical item with you, the checkbox should have a checkmark.
 - b. **Item on shelf:** If the item still needs to be retrieved from the bookshelves, the checkbox should be empty.
4. Add a note about the pop-up collection in the “Note” field.
5. If the Managing Department hasn’t already been filled in for you, select the Managing Department from the drop-down menu. This is almost always the same as the Process Type.
6. Click the “Submit” button near the top.

The screenshot shows the "Place Item in Process" form with the following details:

- Title:** African theatre in performance : a festschrift in honour of Martin Banham / edited by Dele Layiwola.
- Institution:** University of Illinois at Urbana-Champaign (UIU) –Champaign and Urbana, IL
- Process Type:** Teaching, Learning, and Academic Support Work Or
- Do not pick from shelf:**
- Note:** For Orange Room Pop Up Collection
- Managing Department:** Teaching, Learning, and Academic Support Work Or
- Manual Priority:** (empty field)

7. Repeat this process for each item that will be in the pop-up collection. If you want multiple volumes from a series in the collection, place a Work Order on each volume you want. The items will be retrieved from the owning library and shipped to your department.

Checking the Item into a Work Order Department

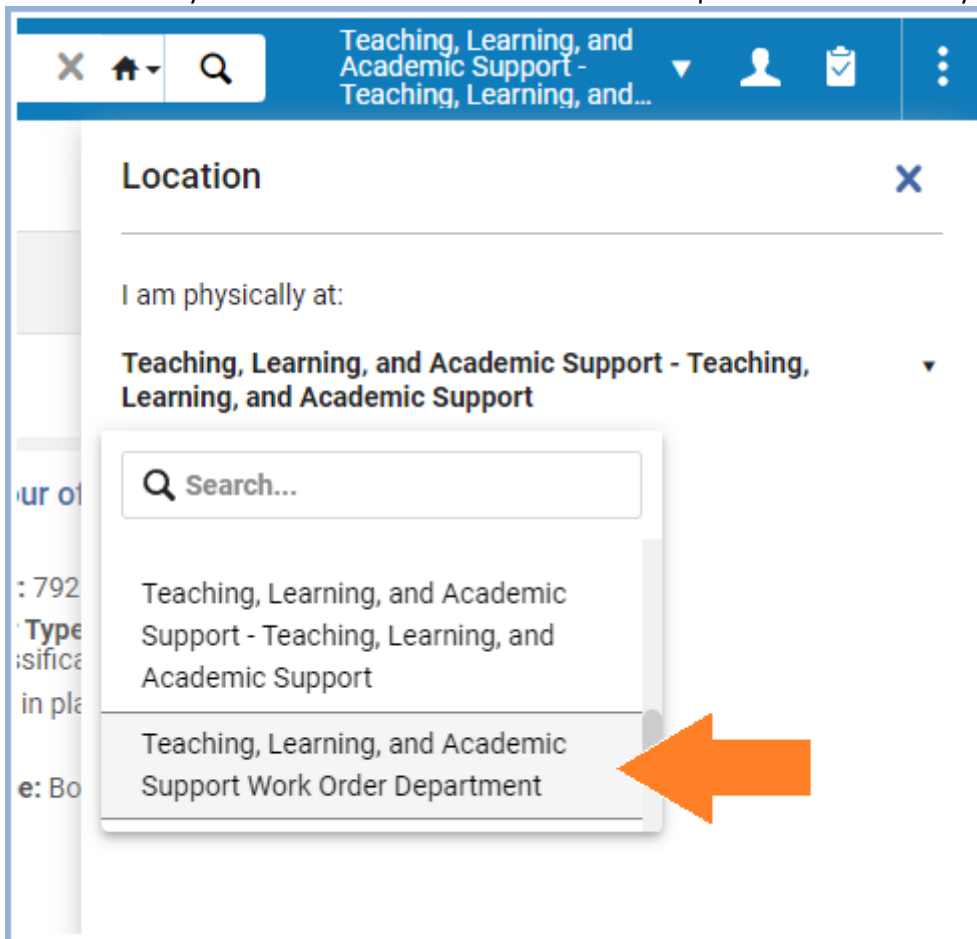

Once the item has been retrieved, it needs to be checked into your library's Work Order Department. It should also be assigned a status to indicate what stage it's at. This makes it easier to locate, especially if it's not going on display immediately.

Basic steps

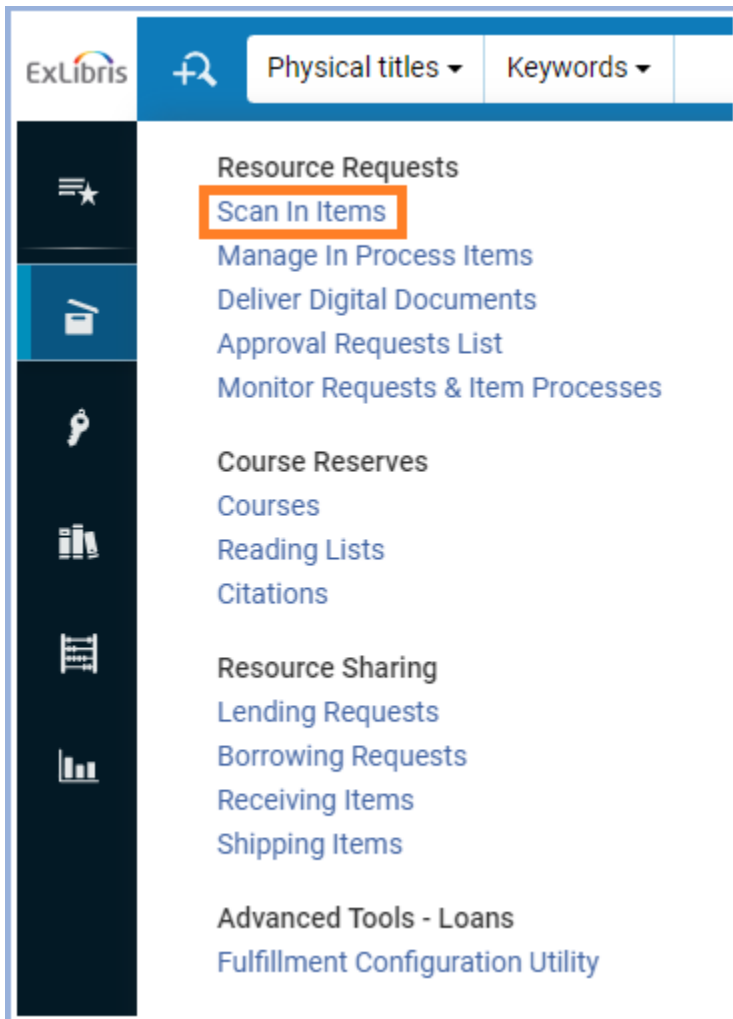

- From the Work Order Department location for your library, go to the "Scan In Items" screen.
- Use the following settings:
 - Set Status To: [The appropriate status for the stage the item is in]
 - Done: No
- Scan in the item barcode.

Detailed Workflow

1. Check that your location in Alma is the Work Order Department location for your library.

2. Go to the "Scan In Items" screen.

3. Use the drop-down menu for “Set Status To” to select the appropriate status.

The screenshot shows the 'Scan In Items' form. At the top right are buttons for 'Manage In Process Items' and 'Exit'. Below are tabs for 'Scan in Items' and 'Change Item Information'. The 'Automatically print slip' section has radio buttons for 'Yes' and 'No', with 'No' selected. The 'Set Status To' dropdown menu is open, showing options: 'TLAS - In Process', 'TLAS - On Display', and 'TLAS - Under Review'. The 'Done' label is highlighted with an orange box. Below the dropdown are input fields for 'Scan item barcode *' and 'Scan request ID'. A 'Create Item' button is on the right. At the bottom, a message says 'No records were found.'

4. The “Done” radio button should be set to “No”.

This screenshot shows the same 'Scan In Items' form. The 'Set Status To' dropdown is now set to 'TLAS - In Process'. The 'Done' label and its associated radio buttons for 'Yes' and 'No' are highlighted with an orange box, with 'No' selected. The 'Scan item barcode *' field has a search icon and 'Look-up or select' text, with 'OK' and menu icons. The 'Scan request ID' field also has an 'OK' button. The 'Create Item' button remains on the right. The 'No records were found.' message is still at the bottom.

- Scan in the item barcode.
- The Destination should start with “Manage Locally”.

Removing the Work Order

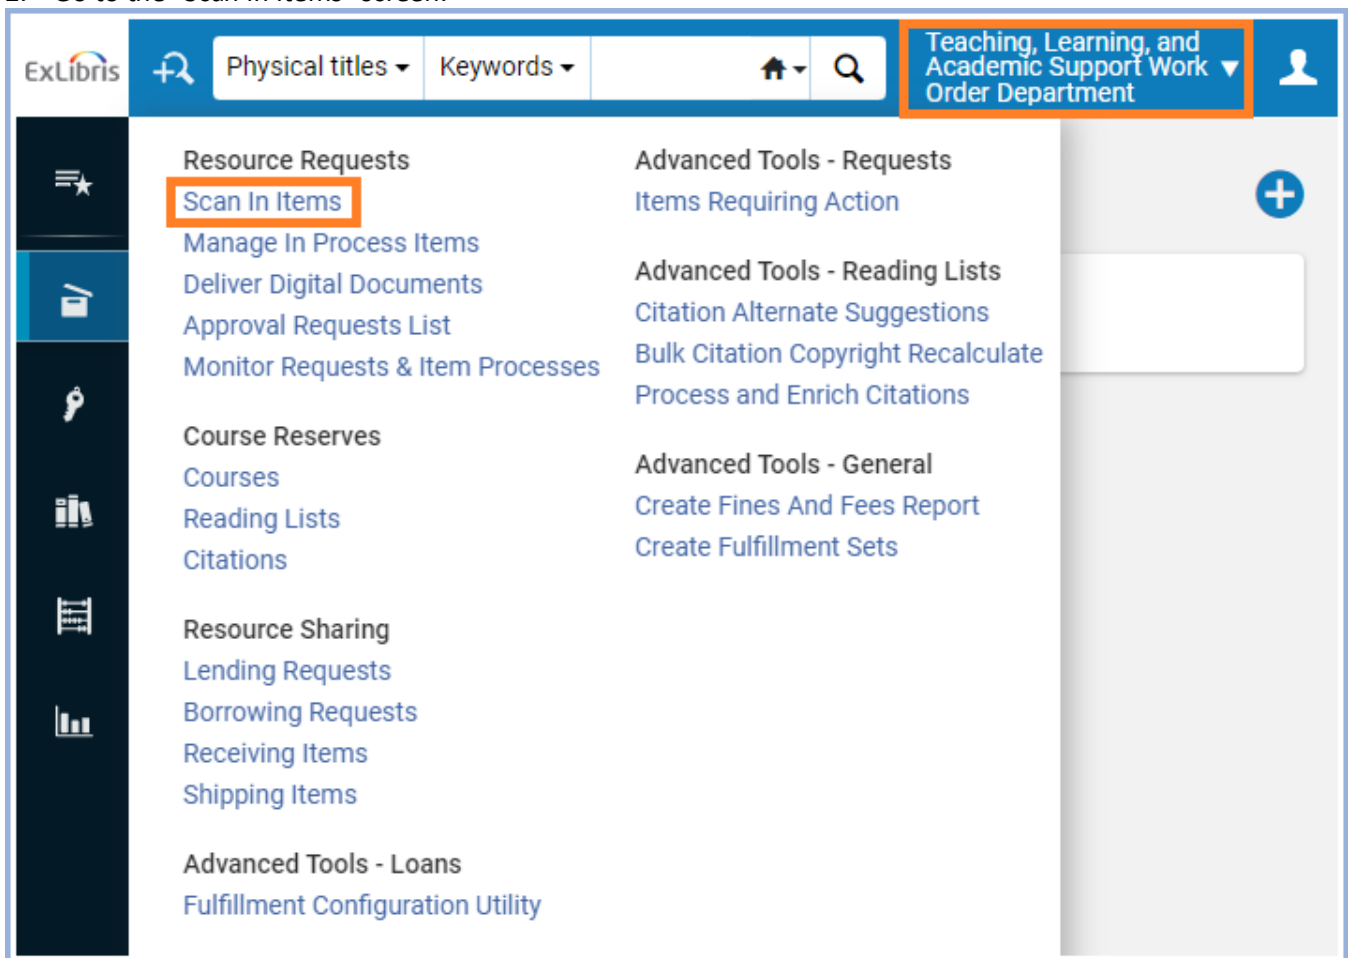

Before the item can be put into the pop-up display, the Work Order must be removed.

Basic Steps

- From the Work Order Department location for your library, go to the “Scan In Items” screen.
- Use the following settings:
 - Set Status To: [Any status]
 - Done: Yes
- Scan in the item barcode.

Detailed Workflow

1. Check that your location in Alma is the Work Order Department location for your library.
2. Go to the “Scan In Items” screen.

The screenshot displays the ExLibris Alma interface. At the top, the search bar shows 'Physical titles' and 'Keywords'. The current location is 'Teaching, Learning, and Academic Support Work Order Department'. The navigation menu on the left is open, and the 'Scan In Items' option is highlighted with an orange box. Other menu items include Resource Requests, Course Reserves, Resource Sharing, and Advanced Tools - Loans. The right sidebar shows 'Advanced Tools - Requests' and 'Advanced Tools - Reading Lists'.

- 3. The "Set Status To" field can be set to any status.
- 4. The "Done" radio button should be set to "Yes".

Changing the Item Location

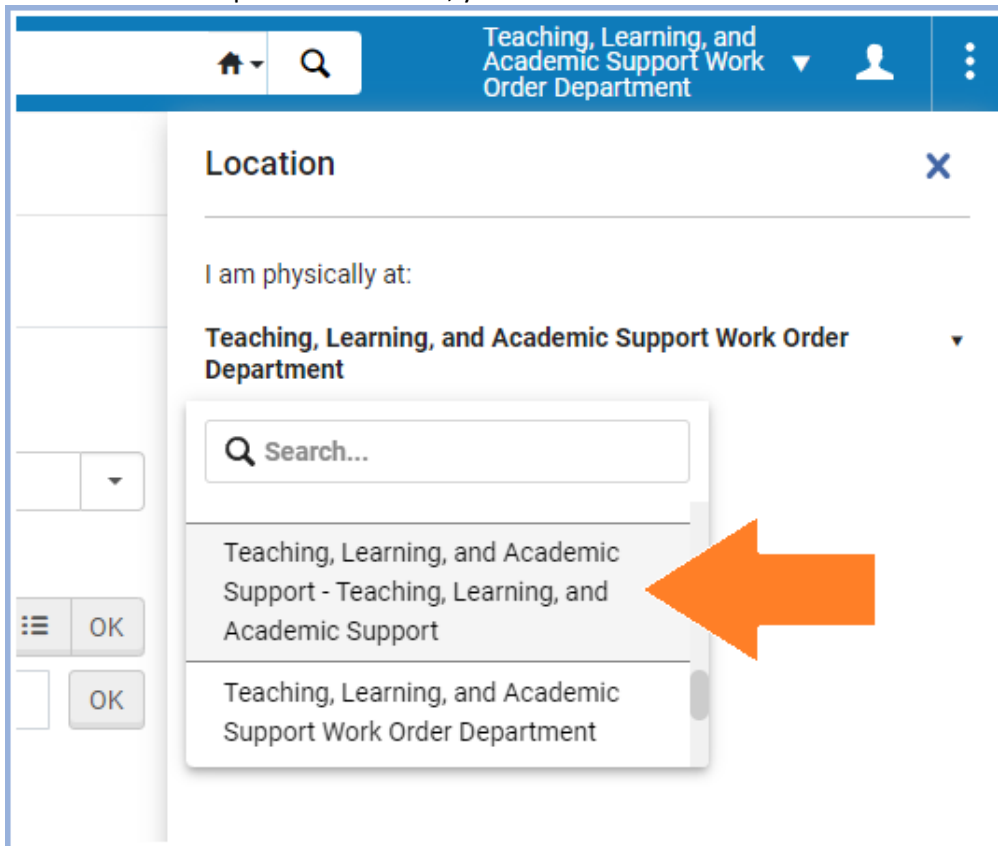

Now that the Work Order has been removed, you can change the item's temporary location to your pop-up collection so the item can be put on display.

Basic Steps

- From the **circulation desk location** for your library, go to the "Scan In Items" screen.
- Select the "Change Item Information" tab.
- Use the following settings:
 - Change Type Field: Temporary
 - Location: [The location your library uses for pop-up collections]
 - Check Requests: Checked
- Scan in the item barcode.

Detailed Workflow

1. Make sure that your location in Alma is the **circulation desk location** for your library. If you're still in the Work Order Department location, you'll add additional Work Orders to the item that will need to be cleared.

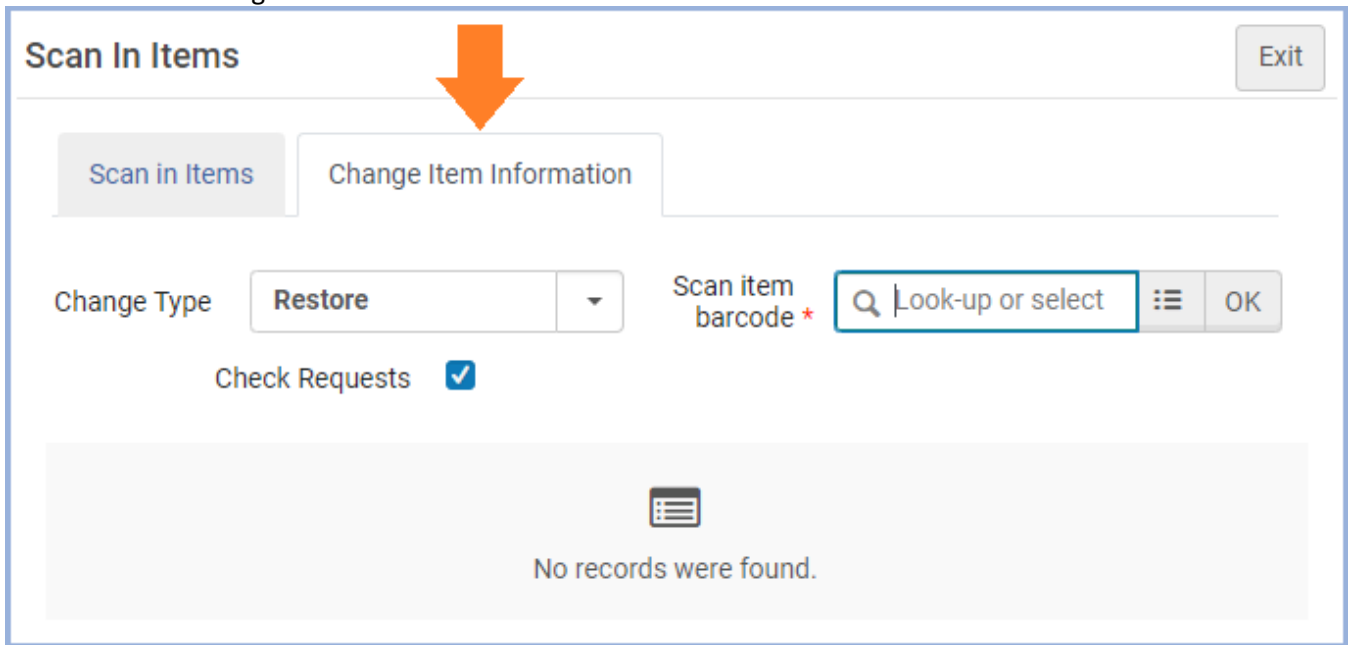

2. Go to the "Scan In Items" screen.

The screenshot displays the ExLibris web interface. At the top, there is a navigation bar with the ExLibris logo on the left, followed by a search bar containing 'Physical titles' and 'Keywords'. To the right of the search bar are icons for home and search. Further right, a dropdown menu is open, showing 'Teaching, Learning, and Academic Support - Teaching, Learning, and...'. Below the navigation bar is a vertical sidebar with several icons. The main content area is a grid of menu items. The 'Scan In Items' item is highlighted with an orange border. The menu items are organized into several sections: Checkout/Checkin, Resource Requests, Course Reserves, and Resource Sharing. The 'Scan In Items' item is located under the 'Resource Requests' section.

9. Put the item out on display in the pop-up collection. It can now be checked out to patrons and checked back in to the pop-up collection as normal.

Returning the Item to its Original Location

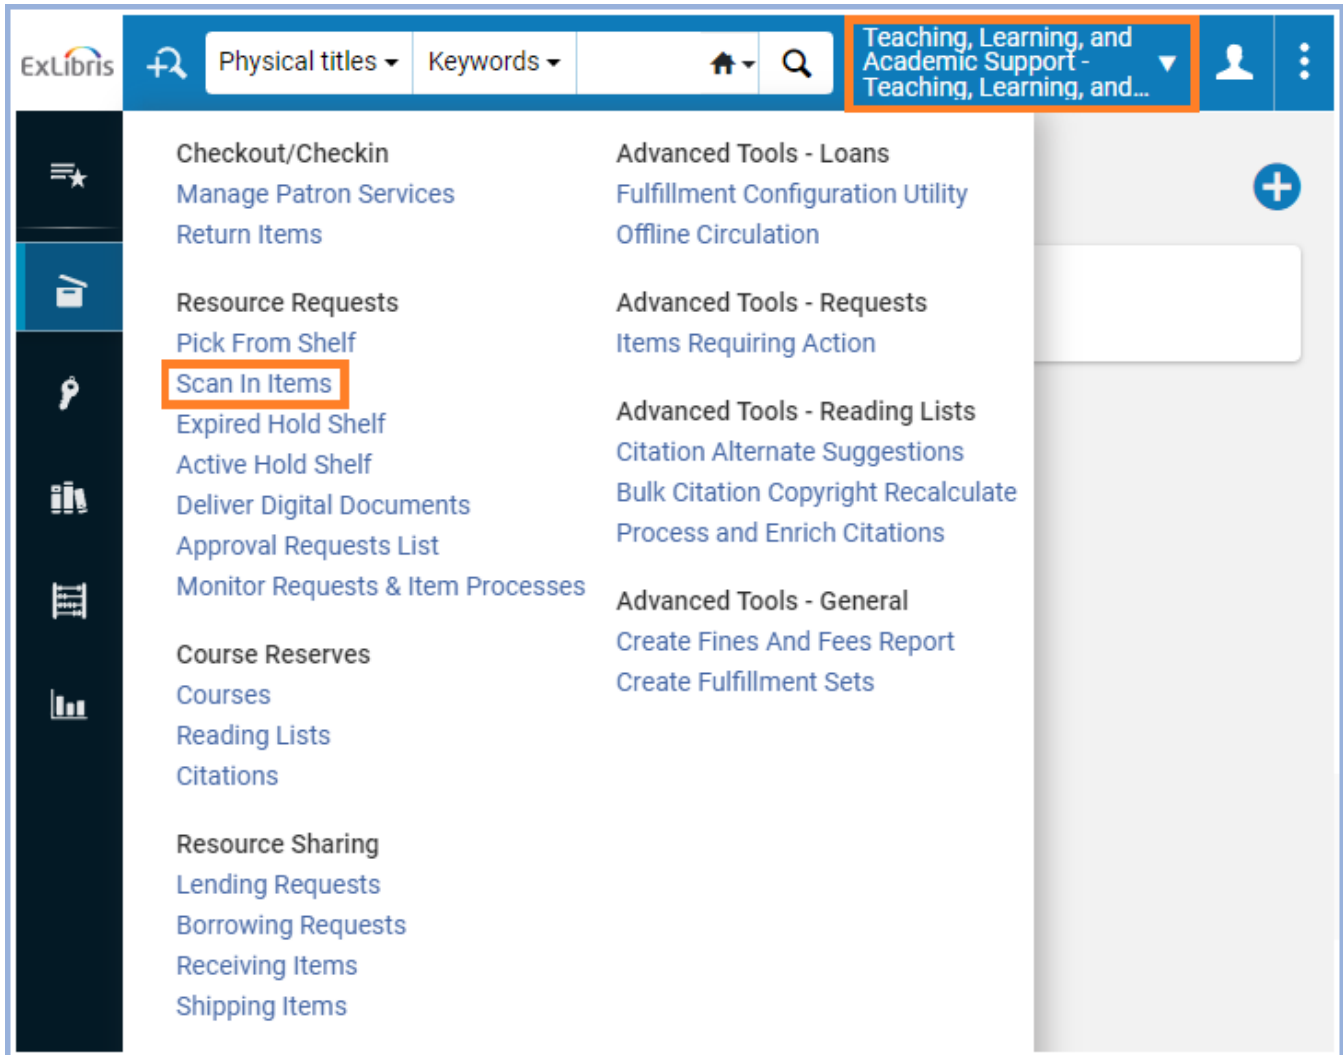

Once the pop-up collection is over, the items need to have their original location restored in Alma so they can be routed back to the owning library.

Basic Steps

- From the circulation desk location for your library, go to the “Scan In Items” screen.
- Select the “Change Item Information” tab.
- Use the following settings:
 - Change Type Field: Restore
 - Check Requests: Checked
- Scan in the item barcode.
- Print the Routing Slip, put it in the item, and send the item to the owning library via Shipping.

Detailed Workflow

1. Make sure that your location in Alma is the circulation desk location for your library.
2. Go to the “Scan In Items” screen.

The screenshot displays the ExLibris Alma interface. At the top, there is a navigation bar with the ExLibris logo, a search icon, and dropdown menus for 'Physical titles' and 'Keywords'. A search bar with a magnifying glass icon is also present. The user's current location is 'Teaching, Learning, and Academic Support - Teaching, Learning, and...'. Below the navigation bar is a sidebar menu with various options. The 'Scan In Items' option is highlighted with an orange box. Other options in the sidebar include 'Checkout/Checkin', 'Manage Patron Services', 'Return Items', 'Resource Requests', 'Pick From Shelf', 'Expired Hold Shelf', 'Active Hold Shelf', 'Deliver Digital Documents', 'Approval Requests List', 'Monitor Requests & Item Processes', 'Course Reserves', 'Courses', 'Reading Lists', 'Citations', 'Resource Sharing', 'Lending Requests', 'Borrowing Requests', 'Receiving Items', and 'Shipping Items'. On the right side of the interface, there are 'Advanced Tools' sections for 'Loans', 'Requests', 'Reading Lists', and 'General', each with several sub-options. A plus sign icon is visible in the top right corner of the main content area.

- 3. Select the "Change Item Information" tab.
- 4. For the "Change Type" field, select "Restore".

7. Alma will print a Routing Slip. Put the slip in the item.

The screenshot displays the Alma print interface. On the left, a routing slip is shown with the following details:

- Time: 3/8/24, 3:50 PM
- Action: Scan in Items
- To: Main Stacks
- Item Barcode: 3 0 1 1 2 0 5 9 4 4 3 5 2 0
- Title: African theatre in performance : a festschrift in honour of Martin Banham / By: Layiwola, Dele.
- Owning Library: Main Stacks
- Logos: CARLI and I-Share
- URL: <https://i-share-uu.alma.exlibrisgroup.co...>
- Page: 1/1

On the right, the print settings are configured as follows:

- Print: 1 sheet of paper
- Destination: LIBPRNCIR08
- Pages: All
- Copies: 1
- Layout: Portrait
- Color: Black and white
- More settings: (dropdown arrow)
- Buttons: Print, Cancel

8. The Destination should be the library where the item came from.

The screenshot shows the 'Scan In Items' interface. At the top, there is a back arrow, the title 'Scan In Items', and buttons for 'Clear List' and 'Exit'. Below this, there are two tabs: 'Scan in Items' (active) and 'Change Item Information'. A 'Change Type' dropdown is set to 'Restore'. To the right, there is a 'Scan item barcode *' field with a search icon and the text 'Look-up or select', followed by a menu icon and an 'OK' button. Below that, there is a 'Check Requests' checkbox which is checked. The main content area shows '1 - 1 of 1' items. A table with the following columns is displayed: Change Type, Title, Destination, Barcode, Location, Call Number Type, Call Number, Item Policy, and Due Back. The 'Destination' column for the first row is highlighted with an orange box and contains the text 'Main Stacks'. The first row's data is: Change Type: Restore, Title: African theatre in performance : a festschrift in honour of Martin Banham / edited by Dele Layiwola., Destination: Main Stacks, Barcode: 3011205..., Location: Stacks, Call Number Type: Dewey Decimal classific..., Call Number: 792.096 Af834, Item Policy: -, Due Back: -. There is a three-dot menu icon at the end of the first row.

Change Type	Title	Destination	Barcode	Location	Call Number Type	Call Number	Item Policy	Due Back
Restore	African theatre in performance : a festschrift in honour of Martin Banham / edited by Dele Layiwola.	Main Stacks	3011205...	Stacks	Dewey Decimal classific...	792.096 Af834	-	-

9. Follow your usual procedure to send the item there through Shipping.
